

Akzent Room

Matt interior paint

- ✓ Matt acrylate paint for premises with normal humidity
- ✓ Contains wax
- ✓ Highest grade of wash resistance (Class I)
- ✓ EU Ecolabel

Description

Properties

Matt acrylate water-borne paint for dry indoor areas

- Excellent properties for indoor use: minimum content of hazardous substances and reduced content
 of volatile organic compounds (VOC), permissible EU VOC content for the product (subcat. a):
 30g/L; maximum VOC content in the product: < 10 g/L
- ✓ EU Ecolabel number EE/044/001. EU Ecolabel confirms that this product has the most environmentally friendly properties, the minimum concentration of hazardous substances and the content of volatile organic compounds is reduced. More information: http://ec.europa.eu/environment/ecolabel/
- ✓ Provides a high level of opacity due to the modern technology which allows the titanium dioxide pigment to be replaced (the production of titanium dioxide is associated with high levels of harmful environmental emissions)
- ✓ Excellent wet adhesion to a variety of substrates, including surfaces painted with alkyd and oil paints
- \checkmark Reinforced with wax, which enhances dirt-repellent properties
- ✓ Highest grade of wash resistance (Class I according to EN13300)
- ✓ Easy applications without dripping or splatter; easy to level out.
- √ Almost odourless
- ✓ The paint does not give off harmful substances into the air and has been classified as emission class M1
- ✓ Dries fast
- ✓ Can be tinted
- ✓ Suitable for sensitive and allergic people

Gloss

✓ matt (approximately 5) in accordance with EN 13300

Wash resistance: class 1 in accordance with EN 13300 young 315 of painting regulations in accordance with RYL 2012 Purpose Painting walls and ceilings in most residential and office spaces (children's playrooms, rooms in childcar facilities, studies, libraries, living-rooms, bedrooms, offices, stainvells, etc.). Not suitable for painting floor doors and furniture. Types of surfaces for surfaces for control of the painting		✓ group 5 in accordance with RYL 2012
Purpose Painting walls and collings in most residential and office spaces (children's playrooms, rooms in children facilities, studies, libraries, living-rooms, bedrooms, offices, stainvells, etc.). Not suitable for painting floor doors and furniture. Types of surfaces for painting Surfaces previously painted with latex, alky or oil-base paints or new surfaces made of concrete, agriculture of the concrete, gypsum board, brick, surfaces finished with puty or plastered and surfaces covered with glass will paper or other rolled finishing materials. For interior use. Quality standards and labels VEN 13300 [Paints and varnishes. Warter-borne coating materials and coating systems for intent walls and collings. More information: http://ec.europa.eu/environment/ecolabel/ The surface to be painted must be carefully cleaned from loose or peeling material, dirt, grass and dust the mount of the production of the first control of the production of the first co		Surfaces previously painted with latex, alky or oil-base paints or new surfaces made of concrete, aerated concrete, gypsum board; brick; surfaces finished with putty or plastered and surfaces covered with glass fibre wallpaper or other rolled finishing materials. For interior use.
Surface preparation before painting with the surface to be painted must be carefully cleaned from loose or peeling material, dirt, grease and dust mould removal is necessary, use Biotol E or Biotol Spray Sandpaper durable alkyd substrates until they are mat and remove the dust thoroughly. If the surface is very dirty, wash it with EasyClean. Use a putly from FILLER line to fill cracks, holes and uneven areas. Sand the filled surface to make it even and remove so dust. Prime filled surfaces with Aquastop or Tiefgrund moisture barrier to reduce porosity. To reduce consumption, we recommend using Akzent Sky for priming. Follow the product instructions for use. Application Stir the paint thoroughly before application. Mixing tinted paint in one container is recommended. Apply 2 coats with a roller or spray gun at the temperature between +10 °C and +25 °C and relative air humidity 80%. When using a spray gun or for the application of the first coat, dilute the paint with water in the amo 5% until it reaches working viscosity. Apply undiluted paint for the finishing coat. Avoid application in draf places and at high air temperature (over +25 °C). When painting, make sure to keep a wet edge. If you new for in unfavorable conditions (drafts, heating devices, high temperature, low humidity), we recommend adding the TIME+ drying time extender (up to 3% of the paint volume). Care for the painted The coating reaches its peak wash resistance in 34 weeks; treat the surface with care until its hardness vash resistance have reached their peak levels. If necessary, the surface can be lightly wiped with a soft sponge or cloth approximately 48 hours after paint application. We recommend using water and neutral or middly alkaline detergents (pH below 9) for cleaning. Do not use organic solvents, abrasive detergents or brushes and rough sponges. Excessive rubbing may make the surface glossy. Use soft sponges and clocleaning. Wipe the surface dry after wet cleaning. Use Biotol E and Biotol Spray to remove mould. Min shelf life 3 years	Min shelf life	3 years

Storage conditions	Store and transport in a tightly sealed container at the temperature between +5+30 °C. Protect from exposure to freezing and direct sunlight.
Safety precautions	The product is not classified as hazardous according to CLP Regulation (EC) no 1272/2008. Warning! Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist. Contains 1,2-benzisothiazol-3(2H)-one, reaction mass of 5-chloro-2-methyl-2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one (3:1). May produce an allergic reaction. Keep out of reach of children. When operating, follow working safety standards and requirements. When spraying wear clothes, goggles, respirator and work in a well-ventilated room. Wash contaminated surfaces and used items using water. As a preventative measure it is recommended to use basic Personal Protection Equipment.
Waste treatment	Avoid release to the environment. Recover unused paint for re-use. Reuse of paint can effectively minimise the products' life cycle environmental impact. Dispose of the contents/containers in accordance with the current legislation on waste treatment. Waste treatment methods: code 08 01 12- Waste paint and varnish other than those mentioned in 08 01 11, waste class (Regulation (EU) No 1357/2014): non-dangerous
